Introduction

Rivers are said to be the means of survival for our civilization. Rivers are considered to be a powerful and precious national asset of India. The conservation of the river ecosystem is non-transferable now. A reasonable legal protection mechanism working hand in hand with the existing statutes must be instituted for the protection of rivers. The restoration and conservation of rivers must be of the highest priority for sustaining humanity and ecology for the present and future generation. River conservation is a planned activity connected with various habitat features and outlines how to conserve all the rivers spread across India.

Marine life

Impact of river pollution

- Marine life is getting affected due to water pollution which is increasing day by day, hence, disturbing the ecosystem of the river.
- This pollution affects the aquatic life as dams are now being built over the various rivers which act as reservoirs of water which is hazardous as all animals find it difficult to keep up to it.
- Not only aquatic life, but humans are also affected as in the end humans drink that polluted water, use it for daily chores and make themselves vulnerable to various diseases i.e. water borne diseases like typhoid, jaundice, cholera, etc which might be life-threatening also. Humans are also exposed to chemically treated water for their daily chores like cleaning, washing, etc.

Conclusion

Rivers are large water bodies in the human-dominated world that are threatened due to various factors which necessitate policies for the conservation of rivers. The current scenario of rivers in India is degrading due to a lack of Governmental policies, legislative tools, and no conclusion regarding a holistic policy. Though river conservation is considered a joint effort by all humans as individuals and not just government regulators but with a regulatory body, this is more effective.

Acknowledgement

I am very happy to express my sincere thanks to our college principal Prof. Mr. S. B. Surywanshi for giving us an opportunity to make this project and we have learned a lot from this project.

I am also grateful to Environmental studies coordinator Prof. Smita Bhoite. I extend my sincere thanks to guide Prof. Chavan madam.

Last but not least, I appreciate my all classmates for helping me through out this project without whom I could not complete this project.

Report on Tree Plantation Drive

Date - 03 Oct .2023

Time - 01 pm to 2.00 pm

Venue- Someshwar Science College Campus

Organized by- National Service Scheme (NSS) Unit, Someshwar Science College

Objective

The objective of the tree plantation drive was to promote environmental conservation and sustainability by planting trees and raising awareness about the importance of afforestation.

Activities Undertaken

1. Tree Plantation: NSS students and staff planted 40 trees of various species, including Nim, Karanj , Chiku, Arjun , Palm, Chafa etc .
2. Soil Preparation: Students prepared the soil for planting by digging pits and adding organic manure.
3. Tree Guarding: Tree guards were installed to protect the newly planted trees from damage.
4. Awareness Campaign: An awareness campaign was conducted to educate students and staff about the importance of tree plantation and environmental conservation.

Participation

A total of 28 NSS students and 5 staff participated in the tree plantation drive.

Outcome

The tree plantation drive resulted in the successful planting of 40 trees, which will help to:

- Reduce carbon footprint
- Improve air quality
- Provide shade and shelter
- Support biodiversity
