Q.1) Define population ?

→ population is a collection of all objects or of their attributes or observations on a random variable under consideration. population is finite or infinite. In most situations the population may be considered infinite range.

Q.2) Define sample.

→ A finite subset of a population is called sample space and the process of selection of such a sample is called sampling.

Q.3) Define statistical test statistics.

→ If x_1, x_2, \dots, x_n is a random sample space from a probability distribution $f(x, \theta)$ then $T = T(x_1, x_2, \dots, x_n)$ a function of sample value which does not involve unknown parameter is called statistics or test statistics.

Q.4) Define sampling distⁿ of stat.
→ If N is large then the no. of all possible sample is also large and the value of a statistics may be classified in the form of frequency table. The probability distⁿ of the statistics that would be obtained in no. of sample each of same size where infinitely large i.e. $r \rightarrow \infty$ is called the sampling distⁿ.

Q.5) Define standard error.
→ The standard definition of sampling distⁿ of statistic is called as standard error (S.E).

Q.6) Define hypothesis.
→ A statistical hypothesis is an observation conjecture about the probability of an observation random variable under consideration, i.e. The statistical hypothesis completely specify it is called simple otherwise it is called composite.
Hypothesis means we assume something to denote statistical hypothesis we will use hypothesis

Q.7) Define null hypothesis.
→ The hypothesis to be tested which is usually of no diff. is term as the null hypothesis and it is denoted by H_0 .

Q.8) Define alternative hypothesis.
→ opposite of null hypothesis is called alternative hypothesis and it is denoted by H_1 .

Q.9) Define Type 1st error and Type 2nd error.

→ In testing of hypothesis the decision of acceptance or rejection of hypothesis is the basis of sample result.

- Type 1st error - Reject H_0 when it is true.
- Type 2nd error - Accept H_0 when it's wrong.
i.e. accept H_0 when H_1 is true.
